Description

Hi, when I try to access my jabber account (hosted at im2.apinc.org with my own domain name) I get the following error in logcat during the authentification (and beem just crash on the device):

```
W/System.err( 9951): java.lang.IllegalStateException: Not connected to server.

I/dalvikvm( 9951): threadid=7: reacting to signal 3
I/dalvikvm( 9951): Wrote stack trace to '/data/anr/traces.txt'
```

What is strange is that if I use a wrong user/pass, it just tells me it cannot authenticate.

I am not Android 2.1 with last version of beem from Market (0.1.4).

History

#1 - 01/30/2011 04:03 PM - Victor N

Hi, I registered to answer:

The problem is not there with the last 0.1.5 beta :)

#2 - 04/20/2011 04:12 PM - Whatcha Computer

I am having this same problem with 0.1.5 from hg and from the source files. Is there a fix for this?

#3 - 02/21/2012 02:34 PM - Frédéric Barthéléry

- Priority changed from High to Normal
