<b>Target version:</b>	0.1.7		
<b>Description</b>			
<p>(10:42:51) erik: Im using Beem with a SE x10 mini. X10 mini uses a green flash on the front to indicate new messages. It would be nice if Beem also could indicate new messages that way.</p> <p>(10:43:44) erik: a led that is... not a flash..</p> <p>Hint for implementation : <a href="http://www.beem-project.com/projects/beem/repository/entry/src/com/beem/project/beem/service/BeemChatManager.java#L281">http://www.beem-project.com/projects/beem/repository/entry/src/com/beem/project/beem/service/BeemChatManager.java#L281</a> The api is described here : <a href="http://developer.android.com/reference/android/app/Notification.html#ledARGB">http://developer.android.com/reference/android/app/Notification.html#ledARGB</a></p> <p>It could be nice to have a setting to enable/disable it, and to change the led color.</p>
