Description			
I translated Beem to Basque using your translation site in April but I can't use Beem in my language yet. Can you include the Basque translation in your next release?

Hi,

The release candidate for the next version of Beem is out (Beem-0.1.8_rc2). It is time to update your translations and send the corresponding strings.xml file if you want it to be include in the next release in nearly two weeks.

Hi,

I have just updated the Basque translation using the PHP Android String Translation Tool. Now all the strings are translated.

Please include the translation in the next release.

Thanks
