Target version:	Locale:
Affected version: 0.1.7	
Description I am having the problem with presence status on beem client. I'm using Samsung GT-S536 which is <i>Android 2.3.6</i> and Sony ST25i which is <i>Android 2.3.7</i> . Both phone have same client, on either side, it shows the other users are unavailable but when I use another IM client like PSI or Citron as a third user it shows all users are available. I am using ejabberd xmpp server.
