

BEEM - Android XMPP - Bug #488

Voice call not working on different network

03/20/2013 03:56 PM - Yakub Moriswala

Status:	New	Start date:	03/20/2013
Priority:	High	Due date:	
Assignee:	Beem-Core	% Done:	0%
Category:	XMPP-Jingle	Estimated time:	0.00 hour
Target version:	Dev	Locale:	
Affected version:	0.1.7		
Description			
<p>Hi Team,</p> <p>I downloaded the Beem-Jingle project. I tested the voice call with having both the phone on same network(it means either both are on same wifi n/w or both are on 3G n/w) it was working perfectly fine. But When I tested with different network(it means one phone on wifi and other on 3G) I can send text message but I am not able to hear the voice in Voice call.</p> <p>Its not giving me any error or exception in server as well as client side.</p> <p>Please help if any buddy knows the solution or anything related to this problem.</p> <p>Thanks,</p> <p>Yakub Moriswala</p>
